

“Healing our land, creating opportunities.”

Facilitating Ecological Restoration in Treaty No. 8

February 16th in Saulteau First Nations (Administration Building)

February 17th in West Moberly First Nations (Community Hall)

Time: 6:00 to 8:00 pm

Bannock and soup to be served both evenings

Working together, West Moberly and Saulteau First Nations are taking steps to heal the land and create new economic development opportunities for our communities that build from our shared success with the Twin Sisters Native Plant Nursery.

Together our communities have secured funding from the Government of Canada to complete a project that supports the shared goal of expanding the communities' position in the reclamation and remediation sector.

We expect that this project will help our communities and development corporations to proactively reclaim the ever-growing footprint of natural resource development throughout the Treaty Territory.

We would like to invite you to attend an information session to introduce community members to the project, highlight preliminary work done to date and brainstorm strategies for restoring our territory.

All members who participate and provide feedback will be given a bingo card and will be eligible to play in a Bingo game that night at 7:30pm.

We thank you for your participation!

Gift Card Prizes!

1st Place - \$200

2nd Place - \$100

3rd Place - \$50
