

The West Moberly First Nations is located a 35 minutes drive/40 kms northwest of Chetwynd, BC, at the west end of Moberly Lake. The area is surrounded by the lake and rivers, trees and mountains. Our community values its mission which is to positively enhance the procession of West Moberly First Nations ethics with respect, honesty, fairness, integrity and self-motivation by promoting open communication with members, Chief & Council and staff. This position is open to members and non-members.

Reclamation Coal Coordinator

About the position

The Reclamation Coal Coordinator is responsible for researching, monitoring and documenting the reclamation of coal sites on West Moberly First Nations land to ensure land is returned to an ecological condition capable of supporting optimal practice of Treaty rights (Not its original state). This position will work out of the WMFN Lands Office and will require some travel to partner sites.

Consultation

- Coordinate and play a leading role in the consultation processes with industry operators who have altered WMFN land.
- Review reclamation plans of industry operators.
- Keep accurate reports on land size using GIS reports and information from Environmental Monitors.
- Work with Biologists and Environmental Monitors to ensure environmental sensitive areas are marked and recorded.
- Coordinate meetings with industry as well as with members to inform on use of land.
- Work with Nursery to grow and develop plants and forestry materials need to restore land.
- Develop workplans with operations team to reforest, plant and bring back land ecological condition capable of supporting optimal practice of Treaty rights (Not original state).

Reclamation Administration

- Develop, review, and coordinate regulatory guidelines of coal reclamation projects to ensure that to the extent possible land is returned to its natural state.
- Monitor timeframes for regulatory process, track application and alert appropriate staff of key dates and deadlines.

- Maintain quarterly regulatory reports to document and track all regulatory submissions as a reference tool for staff, Land Use Manager and Chief and Council.
- Ensure regulatory records, including technical submissions and statements of concern are maintained and are accessible.
- Maintain records from industry on location, status of work, coal removed, and completion dates of projects.
- Review applications comments and mitigation program

The Successful Candidate
